

Side Tilt Carriages

Side Tilt Carriages - Rated by the blade carriage hoisting capability, there are actually four sizings of hook type blade carriages. The hook type fork carriages have been standardized.

Class I carriages are rated for loads up to 2000 lbs. The [forklift parts](#) carriage bar spacing used for Class I is 13 inches. Class II carriages are rated for loads up to 5,550 lbs. Their carriage bar spacing is 16 inches. Class III carriages are rated for loads up to 10,000 lbs. The carriage bar spacing for this particular class is 20 inches. Class IV carriages are rated for cargo up to 15,500 lbs. The carriage bar spacing for this capacity is twenty five inches.

Pin mounted tines vary by the amount of offset between the fork and the blade eye. Different makers would vary the carriages for pin type forks. Carriage capacity would be determined by the carriage pin size and by the tine size.
