

JLG Forklift Parts

JLG Forklift Parts - Following retirement in the late 1960's, John L. Grove set out on a cross country RV voyage. After spending many years establishing his family built crane company with his brother, John had no idea that this journey would bring about the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling technologies was the end result of a road expedition.

Whilst on their trip, John spent time conversing with previous business acquaintances whom the Groves stopped to see along the way. These conversations combined with a tragic event-two workers being electrocuted on scaffolding when the Groves were traveling to the Hoover Dam- John discovered an infinite market for a product that could quickly and safely lift individuals in the air to accomplish maintenance and other building services.

After returning from their vacation, John set up a joint venture with two of his friends and bought a metal fabricating company in McConnellsburg, Pennsylvania. Opening with a small crew of twenty workers, they fashioned and sold their first JLG aerial work platform in 1970. The business incorporates some of the basic design essentials of that original lift into existing designs.

JLG forklifts have come a ways since Mr. John L. Grove returned to town from his cross-country road trip and since the first aerial work platform debuted on the market. Nowadays, the company proudly continues to expand itself into a range of markets globally and develops new products to ensure consumers are capable of being more effective and perform in the workplace within a safer environment.
